**Directive 2002/95EG, replaced by 2011/65/EU, with revision by Directive 2015/863/EU ("RoHS 3")**

Ladies and Gentlemen,

To limit the use of hazardous substances in electric and electronic devices the European Parliament has replaced Directive 2002/95EG by Directive 2011/65/EU and added four other substances according to the amendment of Directive 2015/863/EU.

Directive 2015/863/EU came into force on July 07, 21019.

To comply with the directives any electric and electronic devices including the hazardous substances listed in Directive 2011/65/EU and 2015/863/EU shall not be placed on the market anymore.

Although Directives 2011/65/EU and 2015/863/EU do not apply to our products according to Article 2(4), we imposed the obligation on ourselves to apply the directives on our products.

SIEB & MEYER is aware of its responsibility and therefore aims to use RoHS 3 compliant components for all products, under consideration of stock and depending on the information available through the supply chain.

Best regards,

SIEB & MEYER AG
